Yellow Pages

• Market Place

#### The NUMBERS

- 120 Training Providers
- 60 Participating Federal Agencies
- 12,000 Training Offerings

• 42,000 On-line Registrations

• 35,000 Completions

#### MARKETPLACE

The Marketplace is an internet exchange service to share news, projects, resources and much more. You may "Test Drive" the hottest learning related software tools and products, subscribe to the FLXNews, and communicate directly with the FLX Implementation Team. For most Federal agencies and other registered users, you can search and post your training needs and resources on our "Collaboration" page. You may search for training partners, developers, and course vacancies, as well as post your own course vacancies, training and development needs and resources. Be sure to check out the Marketplace often.

Search or submit learning technology software tools and products. Test Drive is a place for users seeking new tools and products to test. For tool and product makers this is a place to list those tools and products available for FLX users to Test Drive.

The "Collaboration" pages are designed for federal agencies and their learning providers (vendors) to share information, resources and opportunities for partnerships in meeting agency learning needs. All users may search the "Collaboration" message board. Registered users who enter their password access the protected pages which allow agencies and vendors to post and search for information, resources and opportunities for partnerships. Want to be a registered user?

Subscribe to FLXNews, for the latest news and information on learning technology from FLX by email.

If you have any questions or suggestions, please contact us.

#### 10 MOST RECENT TEST DRIVE PRODUCTS

02-Apr-2001

#### IntraLearn Software

All IntraLearn products are fully integrated e-learning platforms that enable Learning Service Providers, corporate enterprises and education providers to rapidly create, deliver and measure interactive learning over the Internet and intranets. The shrink-wrapped products are field configurable, built on Windows 2000 and utilize SQL Server to contain, link, capture, and report all activity. IntraLearn products are e-commerce enabled with remote registration, content delivery, learner profiles, multimedia, exams and assessments. Reports on learner progress and skill attainment are automatically generated. Interactivity and collaboration are built-in with chat, threaded discussions, email, white boards, Internet and live-class links, and group/mentor rooms with file sharing.

19-Mar-2001

#### LectureTech

We are a web based Educational Development software program that produces a slideshow type format that includes a full array of multi-media capabilities that can be easily created and posted using a simple point and click technique. We offer self-grading exams to be used in a pre-and posttest evaluation system. Our presentation transcends a simple text based presentation with a personal asynchronous lecture format. We offer chat, BBS, and Email for student support.

16-Feb-2001

#### ePath Learning ASAP(sm)

The industries first completely browser-based e-Learning "content engine" that enables non-programmers to develop, delivery and manage e-Learning applications such as web-based training, online tests, ePSS and your own online corporate university. ePath Learning ASAP combines a browser-based authoring system, an integrated Learning Management System and web-hosting services to provide the complete infrastructure needed for e-Learning.
